## Class Descriptions

### Gentle Yoga

The Staff at The Sports Club of West Bloomfield welcomes you to our Yoga Oasis. We have two studios to round out our program, the Emerge Studio and the first, and only, far infra-red heated studio in the area, Emerge Power. To help us create a special experience for all practitioners, please follow this short list of rules:

1. Arrive on time and if you must leave early, please do so before savasana. 2. Shoes are not permitted in the studios. 3. No cell phones, even on silent the light is distracting to others' practice. 4. Allow previous class to leave the room before you enter. 5. Noble silence while waiting at the door and during practice.

**Temperature Guide Precision Barre, Barre Fusion, Postural Strength & Conditioning 75-78 Healthy Backs - 78-82 Yin Yoga, Wall Classes 80-85 Slow Flow Vinyasa 82-88 Hot Vinyasa 93+**

The following classes are a great introduction to the fundamentals of yoga. All classes are taught in a warm room incorporating: mindfulness, breathing, and asana (poses) in a calm and peaceful environment.

**Healthy Backs** - The perfect class for beginners or experienced yogi, looking to stretch and strengthen the spine in all 6 directions. You may not work up a sweat in this class, but you will leave feeling longer, looser and more relaxed.

**Restore at the Wall** - All asanas are performed at the wall. In this class the wall is used to provide greater stability, to nurture a greater opening and to reinforce alignment principles. Although this class is held in the hot studio, the far infra-red system may not be used.

**Yin Yoga** - This practice targets the more "yin" parts of the body. Specifically the bones, ligaments and connective tissue of the hips, low back, pelvis and shoulders. Unlike muscles, which are more "yang", which benefit from the repetition and movements found in an active practice, these tissues need to be addressed through long holds in a calm and relaxed environment.

**Precision Barre** - This class uses one's own body weight and unique equipment while integrating the most effective target toning techniques. This allows the entire body to work evenly, creating greater flexibility, strength & definition. This is a workout for everybody.

### Vinyasa

Vinyasa means the synchronization of breath and movement. Vinyasa classes may be more appropriate for the intermediate yogi or the physically active, the classes are more vigorous and athletic. All classes involve linking postures to the flow of one's breath and students are encouraged to move at a pace of one breath/one movement. Classes start with sun salutations to warm up and progress through a sequence of postures of "flows". Once you are comfortable with the sequence of poses presented, you will be encouraged to "flow on your own". A Vinyasa class will include: forward folds, back bends, side bend twists, core strengthening, inversions and balancing poses. Class will conclude with deep stretches that target the muscles worked in that day's flow.

**Hot Vinyasa** - Get your "flow" on and experience all of the health benefits of far infra-red heat, including: immune function improvement, increased blood flow, healthier cells and an increased breakdown of fatty acids. Please hydrate before, during and after class.

**Slow Flow Vinyasa** - A slower version of a Vinyasa practice with attention to alignment and technique. Slow Flow has all components of a Vinyasa practice, including, flowing on your own, inversions and balancing poses. The room will be cooler, the flows, less complex and the holds are 3-5 breaths.

**Moving into Stillness** - This class will be broken into three segments that seamlessly transition into stillness. First we will gently stretch and move in familiar healthy backs poses. Then we will begin to hold them longer for Yin. Finally, we end in stillness. This experiential segment will vary week to week but may include guided meditation, finding a comfortable seated pose, breathing exercises (pranayama), or listening to a Tibetan Singing Bowl.

**Postural Strength & Conditioning** - This class is designed to help correct postural issues caused by overuse syndromes. If your occupation or fitness activity has caused any physical imbalance you will benefit from these specific sets of exercises. With the use of light weights and other props, this class will also help to create more defined muscles, a leaner body and better posture!

**Barre Fusion** - This is a full body workout to tone, sculpt and strengthen muscles. This class goes one step further than the Precision Barre class, fusing aspects of ballet, barre, yoga and Pilates; there may also be some low impact aerobics and classic weight training. All levels welcome

## Class Descriptions

**Cardio /wts Interval** - 40 minutes, done in intervals, of cardio drills and weighted strength exercises. Intermediate to advanced. Cardio-mix- 40 minutes of straight-up choreographed hi-lo aerobics.

**Cardio-mix**- 40 minutes of straight-up choreographed hi-lo aerobics.

**Cardio-pump** - 30 minutes of choreographed aerobics, followed by muscle conditioning using, resistance equipment.

**Cardio Combo** - This class is the perfect blend of "old school" aerobics, balance and posture work with muscle endurance work.

**Boxing Edge** - Classic calisthenic moves intervaled with kickboxing, boxing and martial arts drills. This is a contact class, heavy bags and focus mitts will be used. This class is for you if you're looking for a change of pace and a real challenge! Arrive early to have your hands wrapped by your instructor. Gloves are a must.

**Tabata Training** is a form of High Intensity Interval Training (HIIT). It is designed to get your heart rate up in an anaerobic zone for short periods of time. You will work at an "all-out" effort in four minute intervals. There are eight intervals per Tabata class. Each interval consists of 20 seconds on/10 seconds rest, for eight rounds. There is a one minute recovery before hitting each Tabata segment. This form of HIIT works so well, because of the work-to- rest ratio. The short interval isn't enough to allow you to fully recover, which is great for building endurance. The body works at its hardest and needs to use energy to repair itself post exercise. During this recovery period, the body's metabolism remains elevated for hours burning additional calories. This form of training has science and research studies to back it up. You have never done a workout like this before!

**Step w/wts Interval** - Step choreography and weight work taught in an interval format.

**Zumba** - An exciting dance fitness class using Latin music with traditional dances mixed with other genres of music and dance moves. No doubt, this is a fun and challenging workout for all fitness levels.

**Z - Box** - This is an interval class. You will alternate basic kick-boxing moves with dance inspired aerobic segments. Class will finish with strength work and a Tai-Chi type of type of cooldown.

***Our Spinning classes are conducted on the Spinner® Chrono™ Power bikes from Precor. With direct power measurement, patent-pending magnetic resistance, and the brightest console back light in the industry -- the Spinner Chrono Power bike will exceed your expectations. We are proud to say all of our teachers are certified through Mad Dogg, some have furthered their education and are SpinPower instructors. Formats for classes are specified on the Group Fitness schedule so you can plan your rides for the week. You must sign up at the Service Center, no sooner than 30 minutes before class to reserve a bike.***

**Spin - Basic** - For the new to spinning or seasoned rider, more time will be spent on bike set up and the fundamentals. Please arrive early for the instructor to set up your bike.

**Spin Express** - There is one goal in mind in this class, get it done in 45 minutes! There will always be a warm up and cool down but in the middle you will stay in Zones 3 and 4. This is a great way to keep your metabolism fired up, all day!

**TRX Circuit** - The TRX Suspension Trainer enables you to be in control of the resistance level and range of motion of each exercise. In this class you will safely perform exercises that build strength, flexibility, and balance, all at the intensity you choose. This class is another option for crosstraining.

**Body Conditioning** - All strength and endurance. Any combination of weights, tubing and body bars will be used to challenge you.

**Body Conditioning Plus** - This class goes a step further than the Body Conditioning class and will include short bursts of aerobic drills.

**Strength on the Ball** - With the use of a large stability ball, your body weight and dumb bells, this is a sculpting class, from head to toe. The real benefit to using the stability ball will be increased core strength which leads to better balance and posture. Modifications will always be shown in the class, all fitness levels are welcome.
